1. ORGANIZATION

LiveWorld Incorporated (the “Company”) was incorporated in California on April 10, 1996 and reincorporated in Delaware in July 1999. In April 1999 the Company changed its name from LiveWorld Productions to Talk City, Inc. On May 8, 2001, the Company changed its name from Talk City, Inc. to LiveWorld, Inc. The Company’s principal business is to build, operate and moderate private label online social network and community services for clients who use these services to generate dialogue and relationships with and among their customers and other constituencies.

Clients use these services for loyalty relationship marketing, customer support and business intelligence. The Company’s clients are a diverse group and include, but are not limited to media, consumer packaged goods, technology, and automobile industries, and most but not all are located in the United States.

2. INTERIM FINANCIAL STATEMENTS

The unaudited condensed interim financial information furnished herein reflects all adjustments, consisting only of normal recurring items, which in the opinion of management are necessary to fairly state our financial position, results from operations and cash flows for the dates and periods presented and to make such information presented not misleading. Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been omitted; nevertheless, the Company believes that the disclosures herein are adequate to make the information presented not misleading. Operating results for the three months ended September 30, 2008 are not necessarily indicative of the results that may be expected for the year ending December 31, 2008 or future periods. The condensed balance sheet as of December 31, 2007 was derived from the audited financial statements as of that date. The balance sheet, operating results, and statements of cash flows for the period ended September 30, 2008 were neither audited nor reviewed by an independent accounting firm and are subject to change upon such a review or audit being completed. These condensed financial statements and accompanying notes should be read in conjunction with the Company’s audited financial statements and the notes thereto for the fiscal year ended December 31, 2007, included in its Annual Report on Form 10-K (the “2007 Form 10-K”).

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Revenues — The Company recognizes revenues in accordance with Staff Accounting Bulletin No. 104, “Revenue Recognition in Financial Statements” (“SAB 104”) when the following criteria have been met: persuasive evidence of an arrangement exists, the fees are fixed or determinable, no obligations remain, and collection of the related receivable is reasonably assured.

The Company has certain contracts which are multiple element arrangements and provide for several deliverables to the customer that may include service development, community set-up, on-line community hosting, on-line community management, moderation services, and consulting. Accordingly, these contracts are accounted for in accordance with Emerging Issues Task Force No. 00-21, “Revenue Arrangements with Multiple Deliverables” (“EITF 00-21”). EITF 00-21 requires that the Company assess whether the different elements qualify for separate accounting. Because the Company does not believe that service development and community set-up activities have value to the customer on a standalone basis, this element does not qualify for separate accounting. Accordingly, fees received from service development and set-up activities are combined with the amounts allocable to the relevant undelivered item(s) within the contract. All other elements qualify for separate accounting and have objective and reliable evidence of fair value.

Revenues from service development and community set-up activities are deferred and are recognized ratably over the related development and service portions of the contract. Revenues from applications hosting, on-line community management, moderation services, and consulting are recognized as the services are provided.

Cost of Revenues – Cost of revenues is comprised of direct costs associated with the sales of online social network and community services to clients; the expense associated with the development, set-up and operation of communities, including expenses associated with server costs for hosting the communities, license fees for specified aspects of our platform used to develop the standard set-up for clients, as well as expenses associated with any custom development the client may desire; and the cost of providing moderators and any enhancements the client may request after the community has been set up. These expenses consist primarily of salaries, payroll taxes, benefits and related expenditures for development, set-up, additional add-ons enhancements or upgrades, as well as, software license fees, hardware costs, and salary and related moderation expenses.

Deferred Revenues — Deferred revenues are the amount associated with the initial service development and set-up of the community for our clients. These service development and set-up revenues are paid upfront but recognized ratably as the development and operational service contract is recognized.

Product Development — Product development expenses consist primarily of salaries, payroll taxes, benefits and related expenditures for technology, software development, project management and support personnel. Costs related to the development of new products and enhancements to existing products are charged to operations as incurred. Software development costs are required to be capitalized when a product's technological feasibility has been established by completion of a working model of the product. To date, completion of a working model of the Company's products and general release have substantially coincided. As a result, the Company has not capitalized any software development costs because such costs have not been significant.

Sales and Marketing — Sales and marketing expenses consist primarily of salaries, payroll taxes, benefits and related expenditures for sales and marketing, as well as the community management which are costs associated with account management and client services.

General and Administrative — General and administrative expenses are the consolidated expenses of the operations, facilities, finance, human resources, legal and other administrative functions. The expenses associated with these functions consist primarily of salaries, payroll taxes, benefits, professional fees, and related expenditures for our overall management and administration.

Earnings Per Share — Basic income or loss per share is computed using the net income or loss and the weighted average number of common shares outstanding during the period. Diluted income per share is computed using the net income and the weighted average number of common shares and dilutive potential common shares outstanding during the period. Potential dilutive common shares include, for some or all of the periods presented, outstanding stock options and warrants. The computation of diluted income per share does not assume conversion, or exercise of securities that would have an anti-dilutive effect on earnings. The dilutive effect of outstanding stock options and warrants is computed using the treasury stock method. For the three months ended September 30, 2007 there were 23,401,777 outstanding options and warrants to purchase shares of the Company's common stock and for the three months ended September 30, 2008 there were 25,914,052 outstanding options and warrants to purchase shares of the Company's common stock. The outstanding options and warrants were excluded from the determination of diluted net loss per share as their effect was anti-dilutive.

4. STOCK-BASED COMPENSATION

Effective January 1, 2006, the Company adopted the fair value recognition provisions of FAS 123(R) "Share-Based Payment," which is a revision of Statement of Financial Accounting Standards No. 123. FAS 123(R) supersedes Accounting Principles Board Opinion No. 25, "Accounting for Compensation Arrangements" and amends Statement of Financial Accounting Standards No. 95, "Statement of Cash Flow." FAS 123(R) generally requires share-based payments to employees, including grants of employee stock options and other equity awards, to be recognized in the statement of operations based on their fair values. In addition, FAS 123(R) requires the benefits of tax deductions in excess of recognized compensation expense to be reported as a financing cash flow, rather than as an operating cash flow as prescribed under previous accounting rules.

Determining Fair Value

Valuation Method — The Company estimates the fair value of stock options granted using the Black-Scholes option-pricing model and a single option award approach.

Expected Term — The expected term represents the period the Company's stock-based awards are expected to be outstanding and was determined based on historical experience with similar awards, giving consideration to the contractual terms of the stock-based awards, vesting schedules and expectations of future employee behavior as influenced by changes to the terms of its stock-based awards.

Expected Volatility — a volatility of 69% was used as an estimate of the expected future volatility of the Company.

Risk-Free Interest Rate — The risk-free interest rate used in the Black-Scholes valuation method is based on the implied yield currently available on U.S. Treasury securities with an equivalent remaining term.

Expected Dividend — No dividends are expected to be paid.

Estimated Forfeitures — When estimating forfeitures, the Company considers voluntary termination behavior as well as analysis of actual option forfeitures.

For the three months ended September 30, 2008 we issued a total of 20,000 options with an approximate fair value of \$2,000 for the option grants, and total expense for the period was approximately \$200.

The Company estimated the fair value of its stock options using the Black-Scholes option-pricing model, by using the following assumptions for the options granted during the three months ended September 30, 2008:

	Stock options
Dividend yield	0%
Expected volatility	69%
Risk-free interest rate	3.79%
Estimated term	4 Years
Forfeiture rate	19%

A summary of the stock option activity is as follows:

	Shares Available for Grant	Options Outstanding	Weighted Average Exercise Price Per Share	Weighted Average Remaining Contractual Life (in years)	Aggregate Intrinsic Value (in thousands)
Balance as of June 30, 2008	8,039,493	23,879,052	\$ 0.13		
Granted	(20,000)	20,000	\$ 0.22		
Forfeited	155,000	(155,000)	\$ 0.23		
Exercised	----	----	\$ 0.00		
Balance as of September 30, 2008	<u>8,174,493</u>	<u>23,744,052</u>	<u>\$ 0.13</u>	<u>5.4</u>	<u>\$1,179</u>

The aggregate intrinsic value in the table above represents the difference between the exercise price of the underlying awards and the quoted price of our common stock for the options that were in-the-money as of September 30, 2008.

The 1996 Stock Option Plan (“1996 Plan”) provides for stock options to be granted to employees, independent contractors, officers, and directors. Prior to 2004, options were generally granted at an exercise price which approximates eighty-five percent (85%) to one hundred percent (100%) of the estimated fair market value per share at the date of grant, as determined by our Board of Directors. Since 2004, options have generally been granted at one hundred percent (100%) of their estimated fair market value per share at the date of grant, as determined by our Board of Directors. All options issued under the 1996 Plan and the 2007 Stock Option Plan (“2007 Plan”) have a term of ten (10) years, and generally have a vesting schedule such that they vest ratably over four (4) years, twenty-five percent (25%) one (1) year after the grant date and the remainder at a rate of 1/36 per month thereafter. As of December 31, 2005, all outstanding stock options were exercisable. The 1996 Plan expired in October of 2006 and was replaced by our 2007 Plan. Under the 2007 Plan, the number of shares authorized for grant is 10,696,768. As of September 30, 2008 there were a total of 23,879,052 outstanding options under the 1996 Plan and the 2007 Plan. As of September 30, 2008, there was approximately \$934,000 of total unrecognized compensation expense related to non-vested stock based compensation arrangements granted under the 1996 Plan and the 2007 Plan, as well as, stand alone option grants. The cost is expected to be recognized over the next 4.5 years.

5. PROPERTY AND EQUIPMENT

Property, furniture and equipment consisted of the following items:

(\$ in thousands)	September 30, 2008	December 31, 2007
Computer equipment	\$ 2,239	\$ 2,198
Software	1,179	1,119
Furniture and fixtures	24	24
Leasehold improvements	19	----
Leased equipment	418	285
Accumulated depreciation	(3,191)	(2,718)
Property, furniture and equipment, net	<u>\$ 688</u>	<u>\$ 908</u>

The depreciation expense was approximately \$619,000 and \$473,000 for the twelve months ended December 31, 2007 and the nine months ended September 30, 2008, respectively.

6. SUBSEQUENT EVENT

In November of 2008 the Company took action to align its operating expenses with its current revenue generating opportunities. The Company reduced its headcount, overall payroll expenses, and other operational spending. The total savings for the company will be approximately \$1.7 million annually. As part of the cost reductions the management team has reduced their base salaries and will implement an incentive compensation program based on the financial and overall performance of the company.

Management's Discussion and Analysis of Financial Condition and Results of Operation.

Special Note Regarding Forward-Looking Statements

This report contains forward-looking statements. All statements other than statements of historical fact contained in this document are forward-looking statements. In some cases, you can identify forward-looking statements by terminology such as "may," "will," "should," "expects," "plans," "anticipates," "believes," "estimates," "predicts," "potential" or "continue" or the negative of these terms or other comparable terminology. These statements are only current predictions and are subject to known and unknown risks, uncertainties, and other factors that may cause our or our industry's actual results, levels of activity, performance, or achievements to be materially different from those anticipated by the forward-looking statements.

The following discussion and analysis should be read in conjunction with our financial statements and the notes to those statements included elsewhere in this report. This discussion contains forward-looking statements reflecting our current expectations that involve risks and uncertainties. Actual results may differ materially from those discussed in these forward-looking statements due to a number of factors, including those set forth in the section entitled "Risk Factors" contained in our 2007 Form 10-K.

The balance sheet, operating results, and statements of cash flows for the period ended September 30, 2008 were neither audited nor reviewed by an independent accounting firm and are subject to change upon such a review or audit being completed.

Overview

We build, operate (application hosting), and moderate private label online social network and community services for clients who use these services to generate dialogue and relationships with and among their customers and other constituencies. Clients use these services for loyalty relationship marketing, customer support and business intelligence. Our services consist of the following products delivered on a complete end-to-end or modular basis:

Professional Services: Professional Services include development and set-up of standard systems; customization of the standard system and internationalization and localization. Professional Services also include brand strategy and community consulting and design services that provide expertise in developing social networking/community brand definition, web site design focusing on community architecture, and online community management.

Application Hosting: Application Hosting includes operating applications on our system infrastructure on behalf of our clients. These applications include:

- The LiveWorld Community Center, which is an integrated social network/online community that includes expressive profiles (user name, photo, interests, guestbooks and friends lists), message forums, blogs, photo albums, user video, polls, community galleries, and community calendars.
- Standalone services such as blogs, user videos, message forums, groups, chats and live events (interactive webcasts).

Community Management Services: Community Management Services include creative, community programming and client management services to help design, organize, manage, oversee and evolve the feature, content, and user participation aspects of an online community.

Moderation Services: Moderation Services include content moderation, social engagement and editorial moderation. Moderators are trained personnel that read and view user content for adherence to web site guidelines, and take appropriate action when content violates those guidelines. Such action might include permitting, hiding (or deleting), or escalating such content to a supervisor. Moderation can also involve trained personnel leading topical discussions, or selecting or editing site content for featured display.

Reporting Services: Reporting Services provide clients with metrics and analysis of the online community.

For a majority of our clients we provide our services through our flagship product, the LiveWorld Community Center, which combines a full range of social networking and community services into an integrated branded community. Our services include working with our clients to develop their basic social networking/community brand definition, their overall site design with an emphasis on the community architecture, development and setup of the social network/community site, ongoing application hosting operations, moderation, community management and reporting.

For other clients, we provide only the specific modules they request. For example, with our Moderation Server 2.0 product we may provide moderation services deployed on a client's in-house or third party platform or alternatively we may simply provide application

hosting with the client using our tools to moderate the service themselves. For some clients we only provide message forums and for others we only provide support for live events such as online interactive webcasts.

We offer our services to end user clients as well as advertising agencies. In 2006 we entered into a non-exclusive joint venture with WPP to market our products and services to WPP clients. Pursuant to this joint venture, WPP has the opportunity to earn warrants to purchase our common stock based on the joint venture's contribution to our total revenue. Although WPP is under no contractual obligation to introduce us to WPP clients, we believe our relationship with WPP provides us access to companies that need and embrace online social networks and community services. We further believe that this relationship enhances our overall market visibility and credibility. Our relationship with WPP is non-exclusive and we enjoy close working partnerships with other agencies such as Digitas.

Total Revenues

Our business is primarily based on building recurring revenue streams through the operations of private label online social network and communities for our clients. Our revenues are derived principally from two sources: (i) service development and set-up revenues, and (ii) operations revenues.

We define service development and set-up revenues work as follows: Service development revenues are fees we charge for customizing the standard service we provide to our clients. Set-up revenues are fees we charge for setting up the services based on our standard menu of services provided; and we charge add-ons, or enhancements fees for any additional customized work the client requests after we have begun to provide services to our client. Development and set-up revenues are paid upfront but recognized ratably as the development and operational services are provided.

We define operation revenues as follows: Application hosting revenues are fees we charge for hosting their community on our servers and these fees are generally based on pageviews per month; community management revenues are fees derived from services provided to the client on a monthly basis to manage the community and the community needs of the customer, generally involving a monthly minimum fee for a specified minimum volume of hours with any additional time being charged on an hourly rate; and moderation revenues are fees we charge our clients for moderating their community. These revenues are recognized monthly as the services are delivered.

Cost of Revenues

Cost of revenues is comprised of direct costs associated with the sales of online social network and community services to clients; the expense associated with the development, set-up and operation of communities, including expenses associated with server costs for hosting the communities, license fees for specified aspects of our platform used to develop the standard set-up for clients, as well expenses associated with any custom development the client may desire; and the cost of providing moderators and any enhancements the client may request after the community has been set up. These expenses consist primarily of salaries, payroll taxes, benefits and related expenditures for development, set-up, additional add-ons enhancements or upgrades, as well as, software license fees, hardware costs, and salary and related moderation expenses.

Operating Expenses

Product Development. Product development expenses consist primarily of salaries, payroll taxes, benefits and related expenditures for technology, software development, project management and support personnel. Costs related to the development of new products and enhancements to existing products are charged to operations as incurred.

Sales and Marketing. Sales and marketing expenses consist primarily of salaries, payroll taxes, benefits and related expenditures for sales and marketing, as well as the community management, which are costs associated with account management and client services.

General and Administrative. General and administrative expenses are the consolidated expenses of the operations, facilities, finance, human resources, legal and other administrative functions. The expenses associated with these functions consist primarily of salaries, payroll taxes, benefits, professional fees, and related expenditures for our overall management and administration.

Stock Based Compensation. Stock based compensation expenses include amounts related to the grant of options and warrants to employees and non-employee service providers.

Results From Operations

The following table sets forth our historical operating results as a percentage of total revenues for the periods indicated:

LIVEWORLD, INC.
STATEMENT OF OPERATIONS

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007
Total revenues	100%	100%	100%	100%
Cost of revenues	38	40	36	38
Gross Margin	62	60	64	62
Operating Expense				
Product development	29	25	27	25
Sales and marketing	27	23	23	23
General and administrative	25	28	24	33
Stock based compensation	4	3	3	3
Total operating expense	85	79	77	84
Income (loss) from operations	(23)	(19)	(13)	(22)
Other income (expense)	----	1	----	2
Income (loss) before tax	(23)%	(18)%	(13)%	(20)%

Backlog

We maintain a positive outlook for 2008, and our current backlog for the remainder of the fiscal year is approximately \$3.0 million.

Three Months Ended and Nine Months Ended September 30, 2007 and 2008

Total Revenues

Our revenues decreased from approximately \$2.8 million for the three months ended September 30, 2007 to \$2.7 million for the three months ended September 30, 2008, representing a decrease of approximately 5%. Total revenues decreased primarily as a result of the reduction of Total AOL Revenues which represented approximately \$521,000, and \$0 for the three months ended September 30, 2007 and 2008 respectively. This loss of revenues was offset in part by increased sales of services to new and existing clients other than AOL, this represented growth of approximately 16% period-over-period, or approximately \$376,000 from \$2.3 million to \$2.7 million. We define Total AOL Revenues as revenues earned from both the AOL US and the AOL UK business units.

For the three months ended September 30, 2007, revenues from AOL comprised approximately 19% of our total revenues and eBay accounted for approximately 28% of our total revenues while all other clients represented approximately 53% of our total revenues. For the three months ended September 30, 2008, revenues from AOL comprised 0% of our total revenues and eBay accounted for approximately 27% of our total revenues while all other clients represented approximately 73% of our total revenues.

Revenues from clients excluding AOL and eBay were approximately \$1.5 million for the three months ended September 30, 2007 and were approximately \$1.9 million for the three months ended September 30, 2008. This represented a 29% growth rate period-over-period.

Our revenues increased from approximately \$7.9 million for the nine months ended September 30, 2007 to \$8.8 million for the nine months ended September 30, 2008, representing an increase of approximately 11%. Revenues increased primarily as a result of increased sales of services to our non- AOL clients, which represented growth of approximately 46% period-over-period, or approximately \$2.8 million from \$6.0 million to \$8.8 million which was offset in part by the decrease in AOL revenues which dropped from approximately \$1.9 million for the nine months ended September 30, 2007 to \$0 for the nine months ended September 30, 2008.

For the nine months ended September 30, 2007, revenues from AOL comprised approximately 19% of our total revenues and eBay accounted for approximately 31% of our total revenues while all other clients represented approximately 50% of our total revenues. For the nine months ended September 30, 2008, revenues from AOL comprised 0% of our total revenues and eBay accounted for approximately 26% of our total revenues while all other clients represented approximately 74% of our total revenues.

Revenues from clients excluding AOL and eBay were approximately \$3.6 million for the nine months ended September 30, 2007 and were approximately \$6.5 million for the nine months ended September 30, 2008. This represented an 83% growth rate period-over-period.

Operating Expenses

Product Development. Expenditures for product development were approximately \$713,000, or 25% of total revenues for the three months ended September 30, 2007, and approximately \$766,000 or approximately 29% of total revenues for the three months ended September 30, 2008. This represented an increase of absolute dollars of approximately \$53,000, or 7% period-over-period, and it was an increase of approximately 4% as a percentage of sales. Product development costs were approximately \$2.0 million, or 25% of total revenues for the nine months ended September 30, 2007, and approximately \$2.4 million or approximately 27% of total revenues for the nine months ended September 30, 2008. This represented an increase of absolute dollars of approximately \$424,000, or 22% period-over-period, and an increase of approximately 2% as a percentage of sales.

The period-over-period increases in spending were related to our increased development efforts increased to continue improving our product offerings including developing our API 2.0, LiveBar, and our Community 2.0 (ProEdition and Enterprise edition). The majority of these costs were personnel related, including salary costs, as we hired employees in connection with the ongoing development and enhancement of our products and services. Such efforts may not result in additional new products and any new products may not generate sufficient revenues, if any, to offset the expenses. We anticipate our product development costs to decrease in both absolute dollars and as a percentage of revenues in the near future.

Sales and Marketing. Sales and marketing costs were approximately \$636,000, or 23% of total revenues for the three months ended September 30, 2007, and \$715,000, or 27% of total revenues for the three months ended September 30, 2008, representing an increase of approximately \$79,000 or 12% period-over-period. The period-over-period increase in sales and marketing expenses were a result of our efforts to provide additional services (and associated community management services) to existing and new clients, as well as increased sales and marketing program efforts to develop new revenues with existing and new clients.

Sales and marketing costs were approximately \$1.8 million, or 23% of total revenues for the nine months ended September 30, 2007, and \$2.1 million, or 23% of total revenues for the nine months ended September 30, 2008, representing an increase of approximately \$228,000 or 12% period-over-period. The period-over-period increase in sales and marketing expenses were a result of our efforts to provide additional services (and associated community management services) to existing and new clients, as well as increased sales and marketing program efforts to develop new revenues with existing and new clients.

The substantial majority of the sales and marketing expenses were associated with our ongoing community management services, which are the costs associated with the servicing of existing clients, as opposed to those costs derived from new business development. Expenses in sales activity and marketing activities to attract new clients were minimal. We expect sales and marketing costs to increase as we further develop our sales and marketing efforts to new clients. In addition, if our product development efforts are successful and new products or services are created, we may incur increased sales and marketing expense to promote these products or services to new and existing clients.

General and Administrative. General and administrative expenses were approximately \$798,000, or 28% of total revenues for the three months ended September 30, 2007, and \$681,000, or 25% of total revenues for the three months ended September 30, 2008. This represented a decrease of absolute dollars of approximately \$117,000, or 14% period-over-period. The decrease in general and administrative expenses for the three months ended September 30, 2008 were related to the elimination of outside advisory costs associated with the filing of quarterly reports with the SEC.

General and administrative expenses were approximately \$2.6 million, or 33% of total revenues for the nine months ended September 30, 2007, and \$2.1 million, or 24% of total revenues for the nine months ended September 30, 2008. This represented a decrease in absolute dollars of approximately \$509,000, or 20% period-over-period.

The general and administrative expenses for both the three and nine months ended September 30, 2007 included outside advisory costs related to the filing of a Form 10-SB and the Form 10-Q, with the SEC. The three and nine months ended September 30, 2008 contain only minimal outside advisory costs related to the filing of our 2007 10-K and our Form 15 with the SEC. We expect in the near future for the general and administrative expenses to decrease as a percentage of total revenues as our revenues increase and to stabilize in absolute dollar terms.

Financial Condition, Liquidity and Capital Resources

Our total assets were approximately \$5.2 million as of December 31, 2007, and \$4.2 million as of September 30, 2008. This represented a decrease of approximately \$1.0 million or 25% of total assets. Our cash decreased by approximately \$625,000 as of September 30, 2008 from approximately \$2.0 million as of December 31, 2007. This decrease is a result of our continued personnel expansion up through the period ended September 30, 2008. Our accounts receivable balance as of December 31, 2007 was approximately \$1.4 million which decreased approximately \$232,000 to \$1.2 million as of September 30, 2008.

Our current liabilities were approximately \$2.0 million as of December 31, 2007 and \$1.8 million as of September 30, 2008. This represented a decrease of approximately \$131,000 or 7% period-to-period. This decrease was primarily due to the decrease in accounts payable from approximately \$555,000 as of December 31, 2007 to \$273,000 as of September 30, 2008, or a decrease of approximately \$283,000.

Our current assets, which are made up of cash and cash equivalents, accounts receivable, and prepaid expenses as of September 30, 2008 were approximately \$2.7 million while our current liabilities which are made up of our accounts payable, accrued liabilities and current portions of long-term liabilities is approximately \$1.8 million. This represents a positive working capital of approximately \$800,000. Additionally our current assets are approximately \$670,000 greater than our total liabilities as of September 30, 2008. We feel we have enough working capital to fund operations for the foreseeable future.

For the three months ended September 30, 2007 our use of cash was approximately \$798,000 this use of cash was materially reduced by \$431,000 or use of cash of approximately \$367,000 for the three months ended September 30, 2008. The primary reason for this reduction in the use of cash period-over-period was the reduction in the use of cash in operating activities by approximately \$392,000 combined with the reduction in capital spending of approximately \$133,000, and the increase in cash used to finance capital leases of approximately \$95,000. Our primary uses of cash are the operating costs related to the delivery of the private label online social network and community services. These costs include but are not limited to salaries, payroll taxes, benefits, related expenditures and professional fees. Given the current state of the economy and stock market we have taken steps to improve our cash flows in the fourth quarter, and anticipate being approximately cash flow break-even in the first quarter of 2009. We have taken steps in the third quarter and subsequently in the fourth quarter to reduce overall employee related expenses by approximately \$1.7 million annually. Cash flow from operating activities may or may not be net positive and will vary from quarter to quarter. However we intend to manage the cash flow such that cash flow from operating activities and from our current cash balance is more than enough to sustain the business.

Our net cash used in operating activities of approximately \$294,000 differed materially from the loss from operations of approximately \$602,000 for the three months ended September 30, 2008. The differences were due to stock-based compensation expense, depreciation expense, and the various changes in operating assets and liabilities.

We believe that the combination of cash balances, cash flow from operations will be sufficient to satisfy cash needs for the current level of operations and planned operations for 2008 and 2009.

In the future, we may strategically seek to take advantage of opportunities in the equity and capital markets to raise additional funds in order to take advantage of opportunities that may become available to us, including expansion of operating activities and acquisition of businesses, products or technologies, or otherwise to respond to competitive pressures. There can be no assurance that we will be able to raise additional capital on favorable terms or at all.

Our earnings before interest, taxes, depreciation and amortization, and stock based compensation (“Adjusted EBITDA”), were approximately (\$360,000), or (13%) of total revenues and (\$352,000), or (13%)% of total revenues for the three months ended September 30, 2007 and 2008, respectively. Our Adjusted EBITDA was approximately (\$1,236,000) or, (16%) of total revenues for the nine months ended September 30, 2007 and (\$513,000) or, (20%) of total revenues for the nine months ended September 30, 2008. The reduction in the loss was primarily attributable to our improvement in the net reported loss period-over-period. We define Adjusted EBITDA as net income or (loss) with an add-back for depreciation and amortization, non-cash stock-based compensation expense, interest income net, and income taxes. The following table reconciles Adjusted EBITDA to the reported net income or loss:

LIVEWORLD
RCONCILIATION OF ADJUSTED EBITDA TO NET LOSS

Provisions for income taxes	1	1	4	19
Adjusted EBITDA	<u>\$ (352)</u>	<u>\$ (360)</u>	<u>\$ (514)</u>	<u>\$ (1,236)</u>

Adjusted EBITDA does not represent funds available for management's discretionary use and is not intended to represent cash flow from operations. Adjusted EBITDA has limitations and should not be construed as a substitute for net loss or as a better measure of liquidity than cash flows from operating activities, which are determined in accordance with United States generally accepted accounting principles ("GAAP") and therefore Adjusted EBITDA should be used as supplemental information. Adjusted EBITDA excludes components that are significant in understanding and assessing our results of operations and cash flows. In addition, Adjusted EBITDA is not a term defined by GAAP and as a result our measure of Adjusted EBITDA might not be comparable to similarly titled measures used by other companies.

However, Adjusted EBITDA is used by management to evaluate, assess and benchmark our performance as a service provider, not of any expenses, or income not related to the delivery of our services. We believe understanding the costs directly related to the delivery of our services is beneficial to the management of the company. Adjusted EBITDA is relevant and useful information, which is often reported and widely used by analysts, investors and other interested parties as a measurement of the delivery of a product or service. Accordingly, we are disclosing this information to permit a more comprehensive analysis of our operating performance, to provide an additional measure of performance and liquidity and to provide additional information with respect to our ability to meet future debt service, capital expenditure and working capital requirements.

Our adjusted EBITDA financial information is also comparable to net cash provided by operating activities. The table below reconciles Adjusted EBITDA to the GAAP disclosure of net cash provided (used in) operating activities:

LIVEWORLD

RECONCILIATION OF ADJUSTED EBITDA TO NET CASH PROVIDED BY (USED IN) OPERATING ACTIVITIES
